

Presentation to Asia Pacific Life Science Forum, London

Melbourne, Australia, 12 October 2006 – Starpharma Holdings Limited (ASX:SPL, USOTC:SPHRY) will be presenting at the Asia Pacific Life Science Forum in London on 12 October 2006. This investment showcase brings 20 mid-stage growth companies from Australia and Asian countries before an invited London investment audience.

Starpharma is represented at the forum by Dr Paul Barrett, Vice President, Business Development. A copy of the presentation is available on the Company's website www.starpharma.com.

About Starpharma

Starpharma Holdings Limited (ASX:SPL, USOTC:SPHRY) leads the world in the application of dendrimer-based nanotechnology to pharmaceuticals. The Company's lead development product is VivaGel™ (SPL7013 Gel), a vaginal microbicide designed to prevent the transmission of STIs, including HIV and genital herpes.

VivaGel™ is the first example of a product to come from Starpharma's dendrimer-based discovery pipeline, which also includes specific programs in the fields of ADME Engineering™ (using dendrimers to control where and when drugs go when introduced to the body), Polyvalency (using the fact that dendrimers can activate multiple receptors simultaneously) and Targeted Diagnostics (using dendrimers as a scaffold to which both location-signaling and targeting groups are added to allow location of specific cell type, such as cancer cells).

On 4th October 2006 Starpharma announced the signing of an agreement to acquire US-based Dendritic Nanotechnologies, Inc. (DNT) for US\$6.97m (A\$9.36m) through the issue of Starpharma shares.

Starpharma currently owns 33% of DNT and The Dow Chemical Company is the other major shareholder with a 30% equity stake. DNT will become a wholly owned operating subsidiary of Starpharma Holdings Limited and remain a U.S. corporation based in Mount Pleasant, Michigan. The transaction is subject to DNT shareholder approval, which is anticipated to be obtained within two weeks from the announcement date.

DNT is committed to the innovation, development and commercialization of its proprietary Priostar™ dendrimer technology to create new commercial products with business partners. DNT was incorporated in 2003, is a U.S. company with 16 employees, and is located in Mount Pleasant, Michigan. DNT's chief scientific officer, Donald A. Tomalia, Ph.D., is the inventor of dendrimers. DNT has a broad and comprehensive IP portfolio that comprises approximately 180 patents/applications issued and pending across 32 patent families—a unique level of IP concentration among nanotechnology companies—and has existing licensing agreements with established revenue streams for dendrimer technology. See www.dnanotech.com.

American Depositary Receipts (ADRs): Starpharma's ADRs trade under the code **SPHRY** (CUSIP number 855563102). Each Starpharma ADR is equivalent to 10 ordinary shares of Starpharma as traded on the Australian Stock Exchange. The Bank of New York is the depository bank.

Dendrimers

A type of precisely-defined, branched, nanoparticle. Dendrimers have applications in the medical, electronics, chemicals and materials industries.
