

Organic/Medicinal Chemist

- Do you have an Honours degree in organic chemistry?
- Experimental research into exciting new compounds
- Further develop your research skills in a dynamic multi-disciplinary team

The Company

Starpharma is an ASX listed biotechnology company researching and developing dendrimer-based pharmaceuticals. With our lead product VivaGel™ now at an exciting stage of its development as a vaginal microbicide against sexually transmitted infections, the Research team is capitalizing on new opportunities in dendrimer-based drug discovery.

Where do you fit in?

You will contribute to drug discovery projects in the areas of drug delivery, inflammation and anti-cancer research. Specifically, you will:

- Synthesise, purify and characterize new chemical compounds
- Assist with the interpretation of scientific data
- Use analytical techniques such as NMR, HPLC and Mass Spectrometry
- Record and present your results to a supportive multi-disciplinary team and participate in project meetings

Our ideal candidate will have a BSc, preferably with Honours, and 2-3 years practical laboratory experience. A good knowledge of organic synthesis techniques or experience using preparative HPLC would be desirable. You will enjoy “hands on” experimental work, have an eye for detail, and strong communication skills.

At Starpharma, you will work closely with other talented and committed professionals. We recruit for technical excellence, enthusiasm to learn new skills and a strong commitment to teamwork. We offer a vibrant, friendly work environment with state-of-the-art facilities. We also provide outstanding professional development opportunities and an attractive salary package.

Interested?
