

ASX ANNOUNCEMENT

Starpharma receives DEP[®] milestone from AstraZeneca

Melbourne, Australia; 2 June 2017: Starpharma (ASX: SPL, OTCQX: SPHRY) today announced it has received A\$2.6 million from AstraZeneca following the achievement of the final preclinical milestone for its first DEP[®] candidate, a highly novel oncology molecule from AstraZeneca's portfolio.

As announced on 20 April 2017, the payment relates to reaching an important development milestone prior to the first AstraZeneca DEP[®] candidate advancing to clinical trials. It follows the completion of extensive testing and scale up activities by AstraZeneca.

This milestone payment falls under the multiproduct DEP[®] licence Starpharma has signed with AstraZeneca, whereby Starpharma is eligible to receive potential development, launch and sales milestones of US\$124 million for this initial AstraZeneca DEP[®] product, and US\$93.3 million for each subsequent qualifying product. Under the licence Starpharma will also receive tiered royalties on net sales on the resultant AstraZeneca DEP[®] products, and AstraZeneca funds development costs of the DEP[®] AstraZeneca products.

AstraZeneca recently described this DEP[®] candidate as a "very exciting novel oncology agent" and its relationship with Starpharma as a "highly productive collaboration". In addition to this DEP[®] candidate, AstraZeneca continues to investigate the potential of the platform more broadly across molecules within their oncology portfolio.

The initial announcement made on 20 April 2017 is available via:

ABOUT STARPHARMA

Starpharma Holdings Limited (ASX: SPL, OTCQX:SPHRY), located in Melbourne Australia, is an ASX 300 company and is a world leader in the development of dendrimer products for pharmaceutical, life science and other applications.

Starpharma's underlying technology is built around dendrimers – a type of synthetic nanoscale polymer that is highly regular in size and structure and well suited to pharmaceutical and medical uses. Starpharma has three core development programs: VivaGel[®] portfolio, DEP[®] drug delivery, and agrochemicals with the Company developing a number of products internally and others via commercial partnerships.

Starpharma's lead products are based on VivaGel[®] (SPL7013, astodimer sodium), a proprietary dendrimer. VivaGel[®] formulated as a water based gel and delivered vaginally now has EU regulatory approval for topical treatment and rapid relief of bacterial vaginosis (BV) and is under clinical development for the prevention of recurrent BV. Starpharma has signed a license agreement with Aspen Pharmacare Australia Pty Ltd for the sales and marketing of VivaGel[®] BV in Australia and New Zealand. Starpharma has also signed separate license agreements with Ansell Limited (ASX:ANN), Okamoto Industries, Inc., (TSE: JP3192800005), Sky and Land (China) and Koushan Pharmed (Iran) to market a value-added, VivaGel[®] condom. The VivaGel[®] condom is available for purchase in Australia and in Canada under Ansell's Lifestyles[®] Dual Protect™ brand. Ansell manufactures and sells leading condom brands worldwide, including LifeStyles[®], Manix[®], ZERO[®] and SKYN[®]. Okamoto is the market leader for condoms sold in Japan, which is the world's second largest condom market.

In the wider pharmaceutical field, Starpharma has both partnered and internal programs in Drug Delivery. A number of dendrimer-enhanced, or DEP® versions of existing drugs are under development. The most advanced of these is DEP® docetaxel, a dendrimer-enhanced version of docetaxel (Taxotere®), which is in clinical development in patients with solid tumours. In preclinical studies DEP® docetaxel has shown significant tumour-targeting and superior anti-cancer effects across a range of important cancer types including breast, prostate, lung and ovarian tumour, when compared to Taxotere® (docetaxel). AstraZeneca has signed a licensing agreement with Starpharma for the use of its DEP® drug delivery platform in the development and commercialisation of an AstraZeneca oncology compound, with potential for follow on compounds directed at a defined family of targets.

In agrochemicals Starpharma has a series of partnerships with leading industry players including global leader Adama (formerly Makhteshim Agan) as well as internal programs including an enhanced version of glyphosate (the active ingredient in Roundup®).

Forward Looking Statements

This document contains certain forward-looking statements, relating to Starpharma's business, which can be identified by the use of forward-looking terminology such as "promising", "plans", "anticipated", "will", "project", "believe", "forecast", "expected", "estimated", "targeting", "aiming", "set to", "potential", "seeking to", "goal", "could provide", "intends", "is being developed", "could be", "on track", or similar expressions, or by express or implied discussions regarding potential filings or marketing approvals, or potential future sales of product candidates. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any future results, performance or achievements expressed or implied by such statements. There can be no assurance that any existing or future regulatory filings will satisfy the FDA's and other authorities' requirements regarding any one or more product candidates nor can there be any assurance that such product candidates will be approved by any authorities for sale in any market or that they will reach any particular level of sales. In particular, management's expectations regarding the approval and commercialization of the product candidates could be affected by, among other things, unexpected trial results, including additional analysis of existing data, and new data; unexpected regulatory actions or delays, or government regulation generally; our ability to obtain or maintain patent or other proprietary intellectual property protection; competition in general; government, industry, and general public pricing pressures; and additional factors that involve significant risks and uncertainties about our products, product candidates, financial results and business prospects. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated or expected. Starpharma is providing this information as of the date of this document and does not assume any obligation to update any forward-looking statements contained in this document as a result of new information, future events or developments or otherwise.
